

3+2 ENGINEERING DUAL DEGREE PROGRAM

+

King's College offers a 3+2 Engineering Dual Degree Program in collaboration with the University of Notre Dame. The program allows students to study for three years at King's College taking mathematics, science, pre-engineering and liberal arts courses, and then transfer to Notre Dame for two years to complete engineering courses in their chosen field. Upon successful completion of the 5 year program, students receive both a B.S. in Science from King's College and a B.S. in Engineering from Notre Dame.

King's students will transfer to The University of Notre Dame in one of seven engineering disciplines and will receive a B.S. from King's in the following majors:

B.S. Chemistry:

- Chemical Engineering

B.S. Computer Science:

- Computer Engineering

B.S. Environmental Science:

- Environmental Engineering

B.S. Physics:

- Aerospace Engineering
- Mechanical Engineering
- Civil Engineering
- Electrical Engineering

Advantages of the 3+2 program

With our small class sizes, the 3+2 Program is especially appealing to students who desire individual attention. Our students are actively engaged with their classmates and

professors, and are encouraged to take both analytical and creative approaches towards solving engineering challenges.

In addition to traditional mathematics and science courses, the King's program features a First-Year Engineering Seminar, and second year courses in Programming for Scientists and Engineers, and Introduction to Engineering Systems and Design.

During the three years at King's, students also take a variety of liberal arts courses that develop skills in written and oral communication, moral reasoning and critical thinking. Employers value the liberal arts/ engineering combination since students possess not only technical skills, but also the ability to write proposals and make presentations, and have a broader understanding of engineering systems and the role of technology in our changing society.

To learn more about majoring in Engineering at King's College, please contact the Office of Admission at 1-888-KINGS PA or admissions@kings.edu.

Academic Excellence

A King's education is centered around our nationally recognized core curriculum and challenging major programs, which help students discover and build on their strengths while exploring their interests. An innovative four-year plan of career development across the curriculum helps students focus on finding a job they love and a fulfilling career.

Supportive

All of our classes are taught by professors (not teaching assistants) and average 18 students, which allows for meaningful interaction with professors. More than 86% of our faculty have a Ph.D. or equivalent terminal degree so students learn from and work with world-renowned faculty members. With over 99% of first-year students receiving financial assistance, King's strives to make it possible for promising students to attend our college.

Successful

With 99% of King's graduates employed or attending graduate or professional school within six months of graduation, our alumni go on to successful careers. Internships, undergraduate research and study abroad programs offer students the chance to gain experience in their chosen fields. Comprehensive career advisement, on-campus recruitment and a strong alumni network increase job opportunities.
